ASTRODESIGN, Inc.

## Exhibition at InterBEE 2020 ONLINE Proposals for 8K Utilization in the New Normal

ASTRODESIGN, Inc. (Head office: Tokyo, President: Shigeaki Suzuki) will participate in InterBEE 2020, which is to be held online starting Wednesday, November 18, 2020.

This year, with the main theme of "8K utilization in the new normal," we will introduce new solutions as a response to changes in our society, as well as our latest 8K and 4K products and their applications. We sincerely look forward to your visit.

### Main Exhibitions

- **8K Camera Solutions**  
As new products, we will introduce AB-4831, a portable camera specializing in live output of 8K60p, and AB-4830/AC-4829, multi-purpose cameras with ultra-compact camera heads. In addition, we will provide a video detailing examples of their use for purposes such as VR.
- **8K IP Transmission Solutions**  
We will introduce IG-5114, an IP gateway that converts uncompressed 8K video into IP and interconverts SDI and IP. With the growing demand for 8K video transmission for various events, live viewing, and medical-related fields, we will propose solutions that enable transmission to remote locations with low delay while maintaining the beauty of 8K ultra high-definition video.
- **4K Broadcasting Solutions**  
We will introduce AM-3825, an audio monitor that supports various audio inputs (12G-SDI/MADI/Dante/AES/ANALOG) and loudness measurements (22.2ch/5.1ch/2ch), as well as DM-3430, a 4K monitor with 31.5-inch OLED panels.
- **High-definition Video Solutions**  
We will introduce MC-2087, the latest multimedia scan converter. It is capable of both inputting and outputting 8K signals, and multiple units can be connected to support video over 16K. It is ideal for the simultaneous display of multiple videos onto large LED screens of at racing facilities, for large signage at commercial buildings, and in disaster response rooms and boardrooms, etc.
- **8K Playback Solutions**  
We will introduce, HP-7524 (Tamazone Player) that plays 8K HEVC files. Users can create a system for displaying high-definition 8K content at a low cost by pairing it with an 8K TV. They can also easily create an environment for 8K signage.

➤ **Surveillance Solutions**

We will introduce new products such as the compact PTE (pan, tilt, zoom) LTE-type fixed cameras and 8K IP cameras.

In addition to the above solutions, we plan to introduce a wide range of content, including solutions for display development, projection solutions, TS multiplexers and broadcasting backup systems, 8K broadcasting equipment, post-production solutions, large-capacity data analysis solutions, and 8K+ local 5G solutions.

**Event Outline**

Live Event            Wednesday, November 18, 2020 ~ Friday, November 20, 2020

Open Period        Wednesday, November 18, 2020 ~ Friday, February 26, 2021
