Original 4K high-definition collection of videos “Seas of Ogasawara” that can be presented at events, shows and exhibitions to be launched onto the market

- Product name: 4K high-definition collection of videos “Seas of Ogasawara” (a collection of short videos showing the Ogasawara Islands and their offshore marine life)
- Model number: VT-7003
- Market launch date: Shipment commenced in September 2012

Specialist digital video equipment manufacturer Astrodesign Inc. (headquartered in Ota Ward in Tokyo and headed by Shigeaki Suzuki, company president) is gearing up to launch onto the market a 4K high-definition collection of short videos called “Seas of Ogasawara” (which show the Ogasawara Islands and their offshore marine life). The videos were shot using a 4K shooting and recording system which Astrodesign developed itself. The original 4K presentation can be used for demonstration purposes at events, shows, exhibitions and other venues.

Outline of the 4K high-definition collection of videos “Seas of Ogasawara”

This collection of short videos was shot in February 2012 on location over a 10-day period at the Ogasawara Islands (or Bonin Islands as they are sometimes called in English). These islands, which are a subtropical paradise in the Pacific Ocean, were registered as a UNESCO World Natural Heritage Site in June 2011, and are located about a thousand kilometers south of Tokyo. Using a 4K shooting and recording system developed by Astrodesign, celebrated underwater photographer Masakazu [??] Akagi took videos of the bountiful natural world of the Ogasawara Islands surrounded by deep blue seas, some wildlife found only on these islands, whale watching scenes and the underwater world. There is a total of four titles in the collection.

Scenes recorded

| Media | Scene title | Recording time | Model |
|-------|---|---------------------------|-----------|
| HDD | The Ogasawara Islands | Approx. 5 min. 23 sec. | VT-7003-1 |
| | Fish in the seas off the Ogasawara Islands | Approx. 5 min. 9 sec. | VT-7003-2 |
| | The island of Chichijima | Approx. 4 min. 31 sec. | VT-7003-3 |
| | Offshore marine life of the Ogasawara Islands | Approx. 5 min. 35 sec. | VT-7003-4 |

(*) The recording times may be slightly longer or shorter.

Recording format

| | |
|-------------|--|
| File format | TIFF 16-bit RGB 4:4:4 files with running |
| Resolution | 3840×2160 |
| Frame rate | 59.94p |
| Audio | None |
